

POCITYF

Leading the smart evolution of historical cities

POCITYF is an **EU-funded smart city project** that will help **historical cities** to become **greener, smarter** and **more liveable** while respecting their cultural heritage and attending to their citizens' needs.

● Lighthouse cities ● Fellow cities

ENERGY TRANSITION TRACKS

POCITYF will demonstrate 10 integrated solutions, built on top of innovative technologies. The solutions are grouped, according to the challenges they address, into 4 Energy Transition Tracks.

Positive Energy Buildings and Districts

P2P energy storage and management

E-mobility integration into smart grid

Citizen-driven innovation in co-creating smart city solutions

Are you interested to know how POCITYF will make historical cities smarter and more sustainable?
